Office Action Summary	Application No. 10/538,869	Applicant(s) WATANABE ET AL.	
	Examiner Roberto Rábago	Art Unit 1713	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. Applicants are advised that non-English JP references 09-241448 and 03-258845 have been considered solely on the basis of their English abstracts and applicants' discussion thereof in the specification.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The intended scope of the claimed "one ^{minute}~~hour~~ half life temperature" and the "10-hour half life temperature" cannot be determined because neither the claims nor the specification provide any details regarding how such temperatures are determined. The decomposition rate would necessarily be dependent upon the test conditions during the measurement process, and therefore this information would be necessary to determine whether a particular peroxide, radical generator or process was within the scope of the claims.

RH

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Medalia et al. (US 3,105,057).

The reference shows in Examples 1-4 the compounding of 100 parts ethylene-butene copolymer with 2 parts dicumyl peroxide and 100 parts carbon black in a mill at 177°C. The examples lack the claimed hydroperoxide component. However, the reference expressly suggests the addition of a hydroperoxide such as cumene hydroperoxide, in admixture with a peroxide such as dicumyl peroxide, at col. 2, lines 37-45. One of ordinary skill in the art would be motivated to add a hydroperoxide to the methods described in the working examples because the reference has expressly recommended them. The reference has not disclosed the Mooney viscosity or hydroxyl group concentration of the recommended polymers; however, these properties would be inherent because the methods for making the modified polymers are substantially identical to those of the claims. The burden of proof is shifted to applicants to show that the polymers made by the recommended methods of the reference would not have the claimed unreported properties.
